

FERDCO KT1 Leather Fringing Machine

See video click here

Cut fringe accurate and easily into leather with the KT1.

Size of fringe can be adjusted.

Maximum width of fringe is 2" cut into a 2-1/2" strip of leather.

Material is fed into the machine and carried with a roller foot and lower transporter. The horizontal knife cuts the fringe.

This machine does not sew, only made to cut fringe

Sample of fringe sewn into leather

The sewing is a separate operation
