

# 1-needle, Lockstitch Machine

## DDL-8700L

[Catalog](#)

This is a newly designed JUKI's unique lockstitch machine. The machine is able to sew at a pitch as long as 7mm for both normal and reverse feed directions.

With the adoption of a feed mechanism and thread takeup lever, the machine achieves increased efficiency of feed and well-tensed stitches. It is a basic lockstitch machine suited for sewing leather or heavy materials such as bags, pouches and purses.

DDL-8700L
